Encounter of Cultures -
Women's historical
perspective

① What do these images mean
to us today from a perspective
of women's history?

Cyclic thinking, thinking in a spiral of time	unity in difference	trinity, representing power attributes are needed, youth and young thin body shape	I think the cultural influences (Greek, Phoenician) symbolize a great European Culture/abundance and project and demonstrate the women power (matrones)	Europe & the bull, I would engage myself for making more visible the female sources of our continent because Europe is female → but during the passed time it has been forgotten
Similarity, diversity	· appreciation of woman · continuity · transmission · women's influence · woman as trendsetters · woman save the future	respect dignity self-esteem		
wisdom, responsibility, protection, peace maker, fertility,	the key-words of women are alike, no matter of the origin /geography/ centuries	Evolution, IS THE category, national important or does	Matrones from NETTERSHEIM → symbol of women's solidarity	Sure that we all can live in a matriarchal way together; maybe that our past will become the future again
openness of symbols		the pictures tell us perceptions of another structuring?	My feeling is that they lost power, they became thinner...	more empresses than goddesses?

picture of MATRA:
It symbolizes what I miss in my life very often: female solidarity, sisterhood, commons, vitality, Creativity

would like to get more of it
These images are my fundamental to see the different nations today! I am
